

Press Release

LiveLOOK partners with ServerBeach to deliver reliable instant screen sharing

New York, NY - March 15, 2007 - **LiveLOOK**, an instant screen sharing service provider, announced today its partnership with **ServerBeach**, the industry leader in self-managed hosting. LiveLOOK will use ServerBeach as its hosting provider to support LiveLOOK's unique screen sharing network. ServerBeach will also begin using LiveLOOK instant screen sharing as part of their customer support initiatives, along with live chat.

"LiveLOOK is fast and easy to use. Our sales team has used LiveLOOK to address customer questions effectively and visually walk them through the shopping and signup process and in turn, we have seen an increase in sales and a dramatic improvement in our customers' first impressions of ServerBeach," said Robert Miggins, VP of ServerBeach.

"Instant visual link between customers and agents results in faster problem resolution, and a more positive overall customer experience," said Olga Cantarella, CEO of LiveLOOK. "Unlike other screen sharing applications, LiveLOOK requires no downloads for either agents or consumers, and works on all platforms with all browsers. Instant screen sharing can be used along with live chat, or along with phone support for a more comprehensive customer support experience."

"We are very excited about our partnership with ServerBeach" says Igor Khalatian, LiveLOOK CTO. "LiveLOOK provides unique no-download screen sharing that works along with live chat and phone support. A bandwidth-intensive service such as LiveLOOK screen sharing requires a reliable hosting partner with a robust network. ServerBeach utilizes the highly reputable PEER 1 network, which is a perfect match with our networking needs".

About LiveLOOK

LiveLOOK is an instant screen sharing service. LiveLOOK's web-based screen sharing technology allows for an instant visual link between customers and support agents. LiveLOOK launches instantly from a single click on a button, and requires no software downloads for either customers or agents. LiveLOOK works along with live chat, or along with phone support to offer a more robust customer support experience. LiveLOOK works on Windows, Mac and Linux with any web browser.
